

# Fed up?

The New England Independence Campaign is committed to restoring democracy and participatory government. We believe that no government should produce laws that abhorrently terminate the very definition of “equality” and we believe a free New England should be the bastion of hope and true equality in a world ruled by falsehood and lies to those who are powerless.

## The ideas we are working towards:

1. **Localized Government:** This means smaller and less powerful national government while more powers devolved to states and municipalities. Ordinary people trust and work together with the government more often when the power is held at the state or municipal level.
2. **Neutrality and Non-interventionism:** We believe that war and violence are not only wrong, but are a huge waste of taxpayer money.
3. **End the surveillance state:** We believe that the people have the right to privacy, without the government watching their every move.
4. **Accountable governance:** The New England Independence Campaign believes in increased transparency for elected officials, and putting a stop to outside interference in local elections.
5. **Entirely bipartisan campaign:** With New England being one of the few places in the U.S to have a very mixed political spectrum of over 14 million people, the NEIC believes that our campaign must stay away from “Only Progressive” or “Only Conservative” agendas and focusing upon ONLY New England independence, pride, culture, and care of all people.
6. **Equal rights for all, No excuses, No loopholes:** The New England Independence Campaign believes in human rights, personal freedom, liberty, protection of the environment, transparency, accountability, and respect for all individuals as equal, regardless of religion, race, ethnicity, gender, or personal belief.
7. **Indigenous rights:** We respect the rights of Indigenous peoples to self-determination, and we promise to work with Native peoples to chart a path forward for redressing the harm inflicted through the process of land dispossession and cultural repression.
